Reasons for allowance

1. This communication is in response to applicant's 05/05/2008 amendment in the application of Schulz et al. for a "Method of dynamic adaptation for jitter buffering in packet networks" filed 02/17/2004. The amendment and response has been entered and made of record. Claims 1-4, have been canceled per Applicant's request and claim 5 has been amended. Applicant's argument and explanation with regard to the rejection of the claims are persuasive. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.
2. Claims 5-6 are allowable as evident by applicant's amendment (Claims are renumbered as 1-2 respectively).
3. The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to disclose or suggest wherein the draining packets from the buffer comprises: i) obtaining a current Dequeue TimeStamp; ii) calculating the difference between the current Dequeue TimeStamp and a previous Dequeue TimeStamp is calculated; iii) if the difference is greater than a Dequeue Time Tick, a determination is made as to whether the buffer is empty and if the buffer is not empty a DequeueBuffer event is generated and both the difference and Dequeue Time Stamp are updated; iv) if the buffer is empty data is inserted by invoking packet loss concealment, and the Dequeue Time Stamp is updated; v) following step iv) or if the difference is not greater than the Dequeue Time Tick, a determination is made as to whether a predetermined time period has elapsed since a previous buffer slip adjustment; vi) if said

predetermined time period has elapsed, then if said low watermark exceeds a low watermark threshold then a DequeueBuffer event is generated and a shrink counter is incremented; vii) if said low watermark does not exceed said low watermark threshold, then said high watermark and said low watermark are set to said count value; viii) following step vii) or if said predetermined time period has not yet elapsed, a determination is made as to whether the buffer is overflowing, in response to which said DequeueBuffer event is generated, as specifically recited in claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
